## Part 1

### Community Energy Resilience Planning

- \$2M for each OR county to complete a community energy resilience plan (up to \$50,000 per county)
- To be incorporated into required natural hazard mitigation plans

## Part 2

### Microgrid Services Tariff

- Market based tariff to provide access and incentive for microgrid development.
- Tariff would allocate compensation based on 2 primary criteria “buckets”
  - Grid services (e.g. demand management)
  - Strategic Locations:
    - Resilience Value
    - Equity Considerations
- Also aims to address practical issues such as interconnection, right-of-way, etc.

Timeline – From Passage to Implementation
